

**Proceedings of the 210. WE-Heraeus-Seminar
on
Percolation, Interaction, Localization:
Simulations of Transport in Disordered Systems**
October 1998, Magnus-Haus, Berlin
Guest Editor: M. Schreiber, Chemnitz

Contents

Editorial <i>Michael Schreiber</i>	349
* * *	
Localization	
S-matrix network models for coherent waves in random media: construction and renormalization <i>Martin Janssen, Rainer Merkt, Andreas Weymer</i>	353
* * *	
First order metal-insulator transition in two-dimensional disordered systems <i>Shi-Jie Xiong, G. N. Katomeris, S. N. Evangelou</i>	363
* * *	
Localization behavior of vibrational modes <i>Armin Bunde, Jan W. Kantelhardt, Ludwig Schweitzer</i>	372
* * *	
Acoustic and elastic waves in random media – CPA <i>M. Kafesaki, E.N. Economou</i>	383
* * *	
Electronic states in topologically disordered systems <i>U. Grimm, R.A. Römer, G. Schliecker</i>	389
* * *	
Low temperature behavior of the thermopower in disordered systems near the Anderson transition <i>C. Villagonzalo, R. A. Römer</i>	394
* * *	
Wave functions in the Anderson model and in the quantum percolation model: a comparison <i>Jan W. Kantelhardt, Armin Bunde</i>	400
* * *	
Quantum chaos and level statistics	
Many-body spectral statistics of interacting fermions <i>M. Pascaud, G. Montambaux</i>	406
* * *	

Level repulsion in excitonic spectra of disordered systems and local relaxation kinetics <i>Erich Runge, Roland Zimmermann</i>	417
* * *	
Eigenvector correlations in non-Hermitian random matrix ensembles <i>B. Mehlig, J. T. Chalker</i>	427
* * *	
A numerical study of wave-function and matrix-element statistics in the Anderson model of localization <i>V. Uski, B. Mehlig, R.A. Römer</i>	437
* * *	
Critical level statistics at the Anderson transition in four-dimensional disordered systems <i>I.Kh. Zharekeshev, B. Kramer</i>	442
* * *	
Energy level statistics at the metal-insulator transition in the Anderson model of localization with anisotropic hopping <i>F. Milde, R.A. Römer</i>	452
* * *	
Critical level statistics of a quantum Hall system with Dirichlet boundary conditions <i>H. Potempa, L. Schweitzer</i>	457
* * *	

Interactions

Interplay disorder–interaction in one-dimensional quantum models <i>Jean-Louis Pichard, Dietmar Weinmann, Samuel De Toro Arias, Rodolfo A. Jalabert, Peter Schmitteckert, Xavier Waintal, André Wobst</i>	462
* * *	
Quantum diffusion of interacting particles in a random potential <i>O. Halpap, T. Kawarabayashi, B. Kramer</i>	483
* * *	
Electronic transport in disordered interacting systems <i>Thomas Vojta, Frank Epperlein</i>	493
* * *	
A decimation method for studying transport properties of disordered systems <i>Mark Leadbeater, Colin J. Lambert</i>	498
* * *	
Spectral properties and localization of few interacting electrons in a one-dimensional random potential <i>O. Halpap, I. Kh. Zharekeshev, A. MacKinnon, B. Kramer</i>	503
* * *	

Luttinger-liquid features in the resonant Raman spectra of quantum wires <i>M. Sassetti, B. Kramer</i>	508
* * *	
Lax pair formulation for a small-polaron chain with integrable boundaries <i>Xi-Wen Guan, Uwe Grimm, Rudolf A. Römer</i>	518
* * *	
Exciton dispersion in quantum wells <i>A. Siarkos, E. Runge, R. Zimmermann</i>	523
* * *	

Percolation and Monte Carlo simulations

Can percolation theory be applied to the stock market ? <i>Dietrich Stauffer</i>	529
* * *	
Solving the Schrödinger equation on percolation structures by means of the equation of motion method <i>Julia Dräger, Ole Halfpap</i>	539
* * *	
Energy barriers of spin glasses from multi-overlap simulations <i>Wolfhard Janke, Bernd A. Berg, Alain Billoire</i>	544
* * *	
Gas transport through polymer membranes and free volume percolation <i>W. Paul, H. Weber, K. Binder</i>	554
* * *	
Critical and off-critical singularities in disordered quantum magnets <i>H. Rieger</i>	564
* * *	
Numerical tests of conjectures of conformal field theory for three-dimensional systems <i>Martin Weigel, Wolfhard Janke</i>	575
