

**Proceedings of the Workshop on
Superluminal(?) velocities:
tunneling time, barrier penetration, non-trivial vacua, philosophy of physics**
June 1998, Köln
Guest Editors: P. Mittelstaedt and G. Nimtz, Köln

Title	Author(s)	Page
I. Evanescent mode propagation and simulations		
An atom optics experiment to investigate faster-than-light tunneling	A.M.Steinberg, S.Myrskog, H.S.Moon, H.A.Kim, J.Fox, J.B.Kim	593
Front propagation in evanescent media	M.Büttiker, H.Thomas	602
Superluminal signal velocity	G.Nimtz	618
Observable tachyons in the tunneling regime ?	A.A.Stahlhofen, H.Druxes	625
Electromagnetic simulation of the evanescent mode	X.Chen, C.Xiong	631
Energy balance and energy transport velocity in dispersive media	G.Diener	639
Quantile motion of electromagnetic waves in wave guides of varying cross section and dispersive media	H.D.Dahmen, E.Gjonaj, T.Stroh	645
Superluminal electromagnetic waves in free space	E.Capelas de Oliveira, W.A.Rodrigues Jr	654
II. Superluminal quantum phenomena		
Comments on apparent superluminal propagation	F.E.Low	660
Are predicted superluminal tunneling times an artifact of using the nonrelativistic Schrödinger equation ?	C.R.Leavens, R.S.Mayato	662
Negative time delays in one dimensional absorptive collisions	J.G.Muga, J.P.Palao	671
Transient increase of high momenta in quantum wave-packet collisions	S.Brouard, J.G.Muga	679
Minimum tunneling time in quantum motion	C.Bracher, M.Kleber	687
Locality, QED and classical electrodynamics	D.Kreimer	695
The velocities of light in modified QED vacua	K.Scharnhorst	700
Can EPR-correlations be used for the transmission of superluminal signals ?	P.Mittelstaedt	710
Instantaneous spreading and Einstein causality in quantum theory	G.C.Hegerfeldt	716
The velocity of probability transport in quantum mechanics	G.F.Melloy, A.J.Bracken	726
Wave packet tunneling	H.M.Krenzlin, J.Budczies, K.W.Kehr	732
III. Causality, superluminality and relativity		
Causality in the natural science	P.Weingartner	737
On the role of a limiting velocity in constructive space-time axiomatics	U.Schelb	748
On the application of the Kramers-Kronig relations to the interaction timeproblem	V.Gasparian, G.Schön, J.Ruiz, M.Ortuño	756
Superluminal microwave propagation and special relativity	E.Recami, H.E.Hernández, A.Pablo, L.Barbero	764
Einstein causality and the superluminal velocities of the Cologne microwave experiment	H.Goenner	774
